UP, MP and Odisha

32.7 Million

City population

**31 Cities** 

UP(20), MP(08), Odisha(03)

12.63 Million

Slum population

## **Meet the Presenters**

**Emily Das.** Associate Director, leads monitoring and evaluation for TCIHC in India. She is a senior program researcher with more than 18 years of experience in planning and implementation of M&E activities of various projects relating to MNCH programs in India. Trained as a demographer with a Ph.D. degree from IIPS, Mumbai, she is skilled at designing large-scale sample surveys, processing and managing cross-sectional and longitudinal data on population, health and nutrition.

Mitin Kumar Dwivedi – Senior Manager of Programs (City Planning) – plans, facilitates and manages the city specific plans for TCIHC. He brings 16 years of experiences in family planning, urban health, maternal and child health, HIV/AIDS, women's empowerment and adolescent girls' family life education program, and program management.

**Deepti Mathur** is a Senior Specialist for Knowledge Management at TCIHC. Deepti is a results-oriented professional with about 18 years of experience in designing, planning and executing projects around issues that include family planning, reproductive health, pediatric and corneal blindness, eye banking, HIV/AIDS, and disability and education. In her current role, she stewards the knowledge management unit and drives critical components of TCIHC's qualitative data collection efforts.

**Anupam Anand** is currently serving as TCIHC's Manager of Programs in Moradabad, Uttar Pradesh, He is responsible for overall implementation of TCIHC in the city and strengthening family planning services by providing technical, managerial and operational support to NUHM and district health administration. He has 15 years of extensive experience in establishing program operations, strategic alliances, project management, NGO Management, Data Management & Analysis.

# **Webinar Objectives**

- Introduction: The power of D4D
- Detail the five steps of TCHIC's D4D approach
- Share big wins and key learnings
- Offer an opportunity for Q&A so participants can adapt the approach to their context

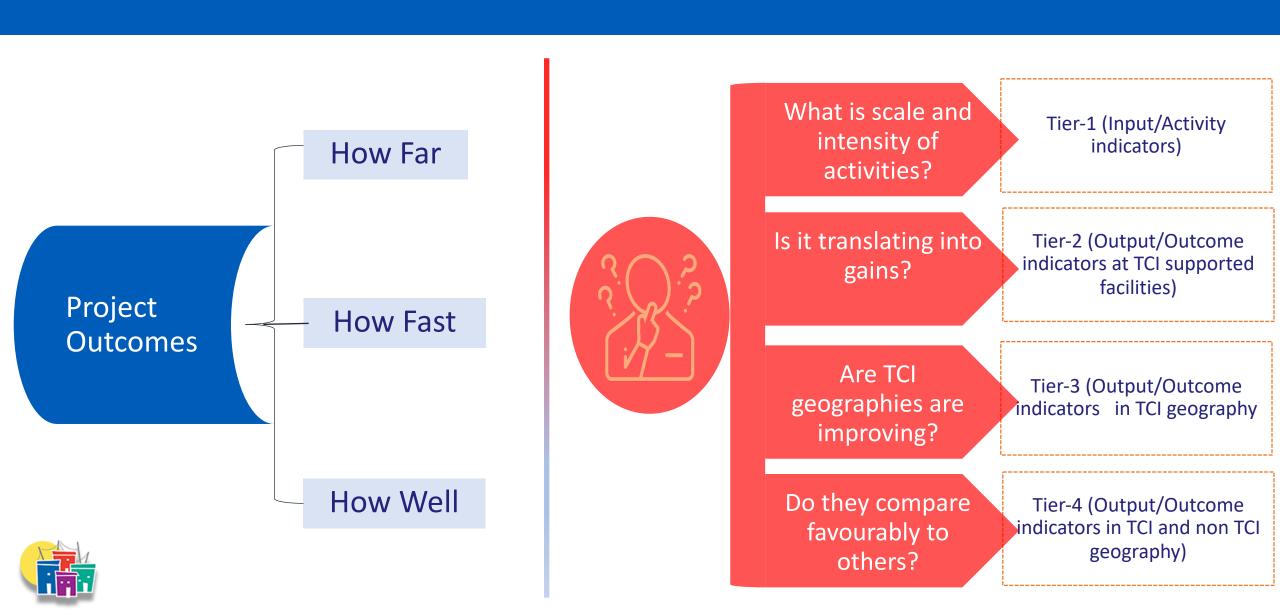

# Take a Poll

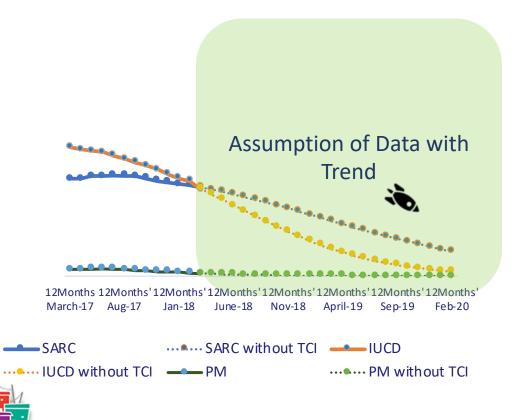

# Why D4D-Data Use for Decision Making

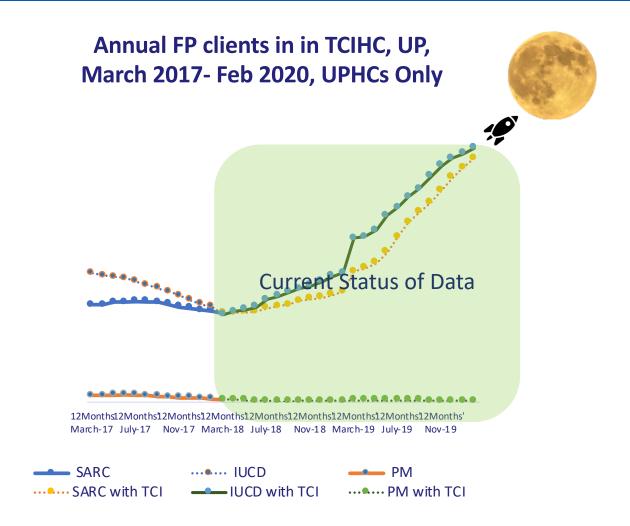

## The Power of D4D

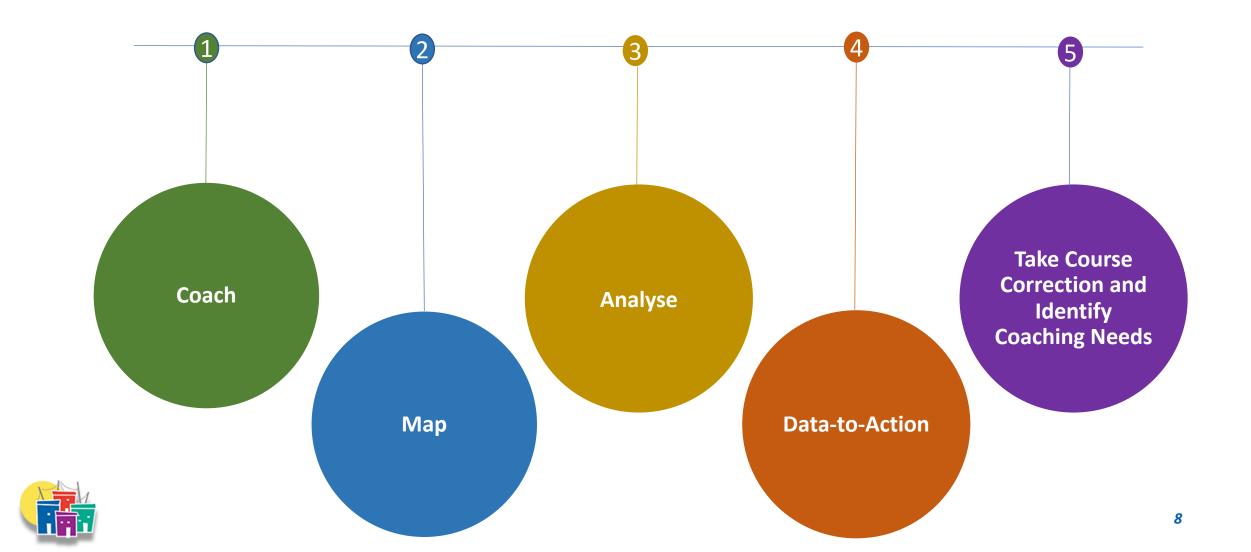

Annual FP clients in TCIHC, UP, March 2017- Feb 2020, UPHCs Only

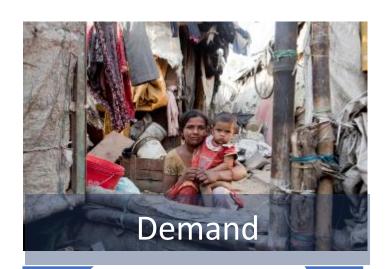

# **How To Do It: The Five Steps Cycle**

# Step 1: Coaching Key Stakeholders To List Out Decisions

- Are we reaching clients in need of family planning services? "
- How do we motivate non performing front line workers to improve performance?

- How do we ensure that women get a method of their choice?
- Are facilities regular to provide FP services through FDS?

#### **Enabling Environment**

- Are budget for family planning properly allocated and utilized to urban facilities?
- Is there a mechanism to review FP in urban health platform?

# Step 2: Mapping Existing Data To Inform Program Design

#### What Was Available

National Family Health Survey (NFHS) Data

• Frequency was longer

Government Health Management Information System (HMIS)

Quality of information was a concern

Number of women/men received contraceptives by method, by month, by facility, by city

• Timeliness and consistency was a concern

#### What Was Not Available

Data on reach and quality of reach

Not recorded by government and we introduced PMIS

Data on age and parity of contraceptive users

Not recorded by government and we introduced PMIS

Information on supplies by facility

• Initially not available and PMIS captured the same

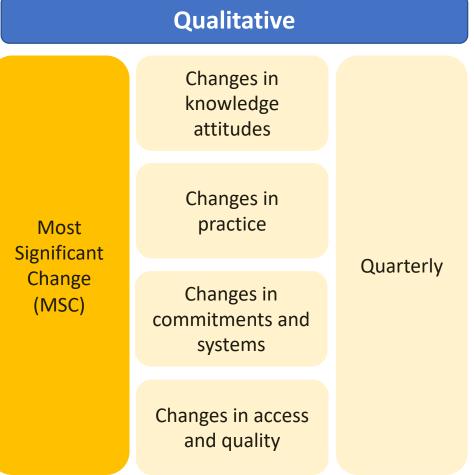

Information on active/inactive frontline workers

 No records with government, PMIS captured the same

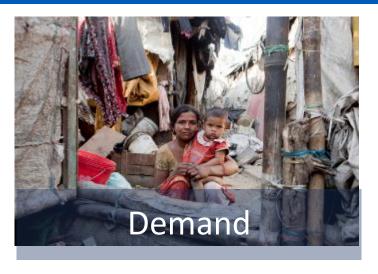

# Step 2: Mapping Existing Data To Inform Program Design

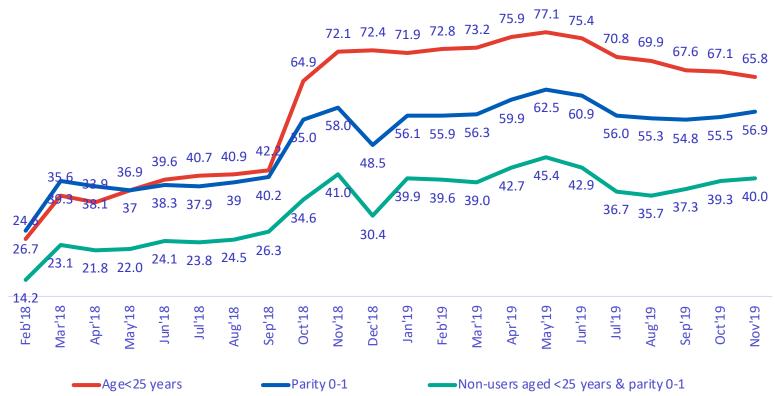

#### Quantitative Input, Output & Outcome: Intensity of implementation, # **PMIS** Monthly IUCD and injectable acceptors by age and parity **Outcome & Impact:** Most **HMIS** Number of FP acceptors with Monthly Significant method mix Change (MSC) **Output, Outcome & Impact:** Output mCPR, Service delivery data, Tracking Exposure to intervention, KAP Annually Survey towards contraception

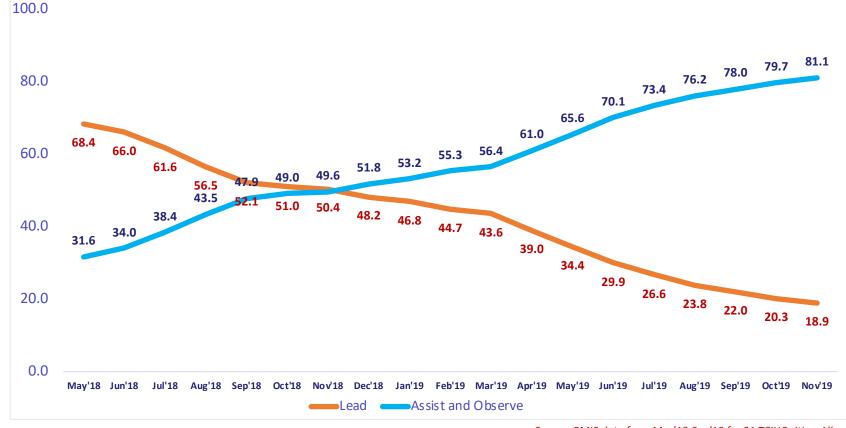

Are we reaching clients in need of family planning services?

#### Are ASHAs equipped with counselling skills?

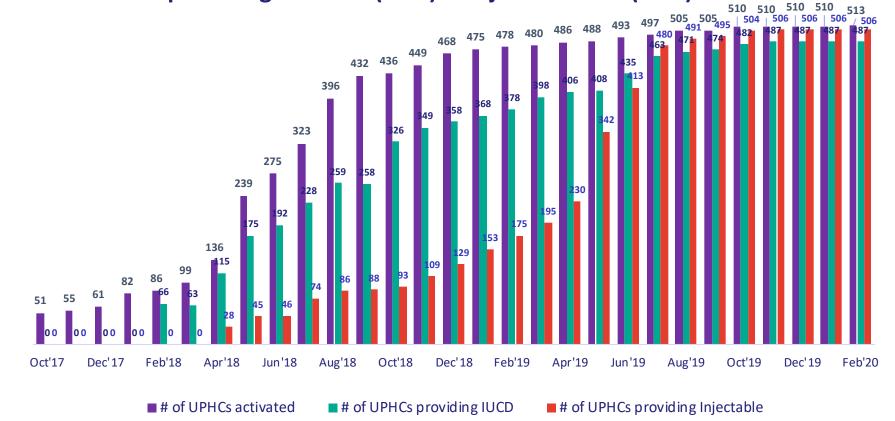

Are full basket of Choice available at facilities?

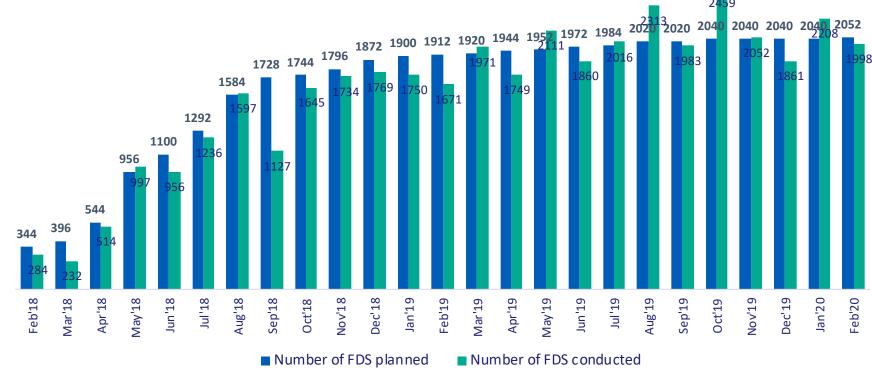

# UPHCs providing IUD-487 (95%) & Injectable 506 (98%)

#### Are facilities regular to provide FP services through FDS?

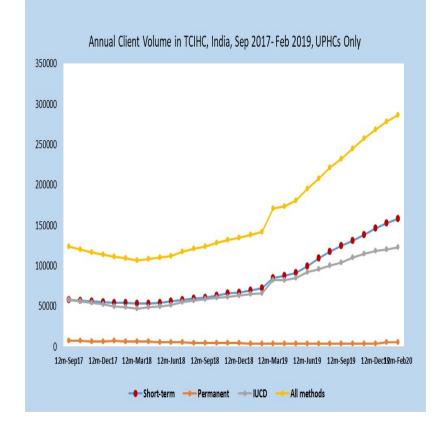

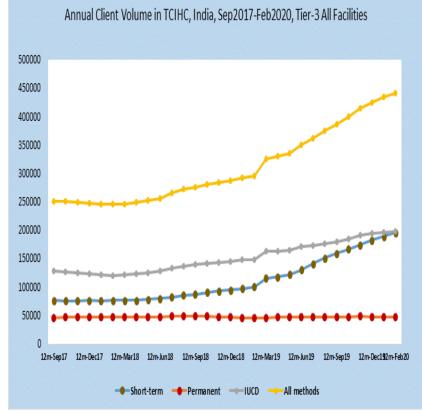

**Enabling Environment** 

#### Is there an annual increase in FP client volume?

#### Tier 3 Facilities

**Enabling Environment** 

Are budget for family planning properly allocated and utilized to urban facilities?

#### Local Contribution in UP (18-19)

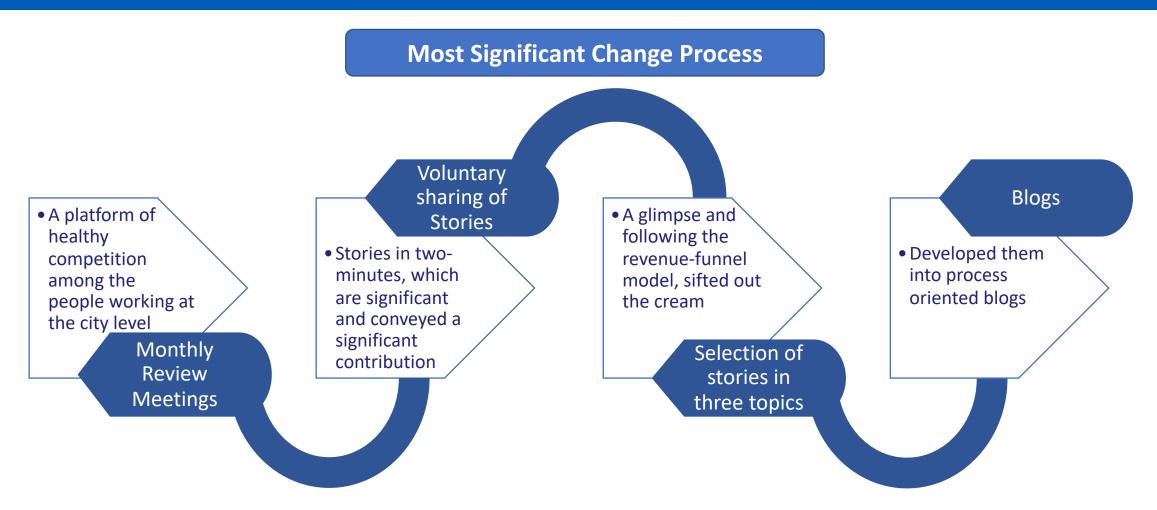

<b>Thematic Area</b>	Allocation	Utilization	% of Utilization
FP	2,347,447	1,787,832	76%
NUHM	27,561,092	23,982,064	87%

#### Local Contribution in UP (19-20)

		<b>Utilization</b> (till	
<b>Thematic Area</b>	Allocation	Dec.19)	% of Utilization
FP	1,960,022	842,166	43%
NUHM	27,190,712	14,981,379	55%

## **Qualitative Data To Action**

## **Qualitative Data To Action**

"We productively utilized our existing human resources for strengthening family planning services. I am thankful to TCIHC for helping us find a quick solution for this ongoing problem. In fact, I will explore this solution for strengthening other health programs as well, like tuberculosis."

- Meerut's Deputy Chief Medical Officer

#### **Voices Captured In MSC Stories**

"I am happy that I can avail family planning services of my choice from nearby Zakir colony UPHC. Because a few months back when I visited the district hospital for the same, I had to return without availing services due to high client load. Even the district hospital is quite far from my place. Now whenever I meet any woman of my area interested in family planning, I tell her about our nearby facility." —

Zahida Parveen 24-year-old mother of three...

"During Mission March, all ASHAs, ANMs and AWWs worked as team to reach out to more men and women with family planning messages. Getting more family planning clients was our prime mission. TCIHC team and medical officers of UPHCs guided us on how to improve our efficiencies. Now, family planning is a part of my daily counselling."

 Kusum Lata Kashyap Urban ASHA Lucknow, Uttar Pradesh

#### **Monthly Review Meetings at State**

#### **Sharing with District Officials at City**

Sharing of analysis collected through various data points

Defining the corrective measures

Preparation of action plan with time line

Issuance of Directives, if required

#### **Dissemination of Directives to SDPs and Actions**

Visits of officials to adherence of directives

Circulation of directives till FLWs

Monitoring the changes

Report to district officials

#### **Sharing with State Level**

- Directorate of FW
- •SPMU of NHM
- •TSG Urban Health
- •TSG family Planning
- TSG AYSRH
- TSG Quality Assurance

- Changes observed in city wise strengthening of urban FP
- Cities initiatives to remove bottlenecks
- Challenges faced by cities
- Support required to release supplementary guidelines
- Promotion of state official visits at UPHCs

**Key Points** 

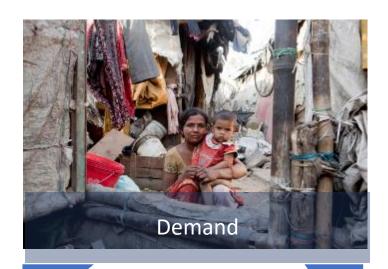

# Step 5: Take Course Correction and Identify Coaching Needs

- Maintaining and regular updating of UHIR registers
- Preparation of due list of FP clients
- Training/refresher of FLWs on FP

- Uninterrupted supply of FP commodities at UPHCs
- FPLMIS training up to FLWs
- Training/refresher of service providers on FP
- Introduction of quality standard tool for FP

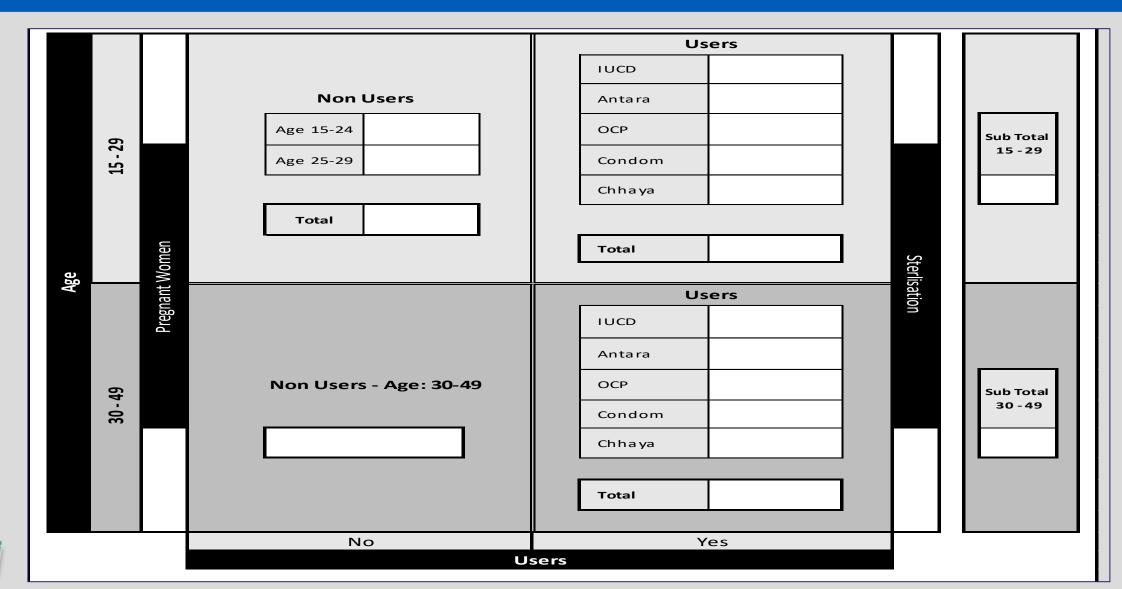

#### **Enabling Environment**

- Regular review of facility reporting rate, timeliness and accuracy
- Regular review of financial allocation and utilization
- Periodically visits of DQAC to UPHCs
